

INTENT TO SUBMIT

Journal Scope

The Journal of Laser Applications[®] is LIA's peer-reviewed archival journal for articles describing recent, significant results aimed at understanding and improving laser technology, applications, and safety. Areas of special interest include, but are not limited to: Laser Materials Processing and Interaction, Laser Sensing and Measurement, Biomedical Applications, and Laser Safety. Emphasis on practical applications is welcomed.

Manuscript Submission

Use this checklist to avoid the most common mechanical errors in submitted manuscripts:
The manuscript must be double-spaced throughout.

Number all pages in sequence.

1. Type title and abstract on a separate first page.
2. Type list of references (including footnotes), list of figure captions, and tables on pages separate from each other and from the main text.
3. Type references in the style used by AIP journals.
4. Provide marginal notes to clarify symbols and expressions for the compositor.
5. Submit (a) three clear copies with clear copies of figures and (b) the original figures.
6. The original figures must be clear line drawings or high-contrast, glossy prints identified by figure number and author's name.
7. If you wish to submit an electronic file, indicate so in the cover letter that accompanies your original submission. Wait for further instructions from the Editorial Office before sending your disk or file.
