

	Materials – Keng H. Leong and Paul G. Sanders	375
11.3.2	CO <sub>2</sub> Laser CW Seam Welding of Common Materials; Conditions for Penetration Welding – Robert J. Steele	379
11.3.3	CW CO <sub>2</sub> Laser Welding of Common Materials – E. A. Metzbower	381
11.3.4	Pulsed CO <sub>2</sub> Laser Welding of Common Metals – Chris Rickert	383
11.3.5	Nd:YAG CW Welding of Common Materials – C. L. M. Ireland	383
11.3.6	Nd:YAG Laser-Pulsed Welding of Common Materials – David C. Weckman and Hugh W. Kerr	387
11.3.7	Comparison of Penetration Welding with Nd:YAG and CO <sub>2</sub> Lasers – David Havrilla	399
11.3.8	Laser Welding with Filler Wire – Andreas Gebhardt	400
11.3.9	Welding with Other Lasers – Sunichi Sato	404
11.3.10	Operating Costs for Penetration Welding – David Havrilla	407
11.4	Industrial Applications of High-Power Laser Welding	409
11.4.1	Introduction – Geoff J. Shannon	409
11.4.2	Key Aspects – Geoff J. Shannon	409
11.4.3	Welding Thin Sheet Material (< 0.5 mm) – Geoff J. Shannon	411
11.4.4	Sheet Material (1–3 mm) – Geoff J. Shannon	411
11.4.5	Welding Plate Material (4–12 mm) – Geoff J. Shannon	412
11.4.6	Weld Tolerances – Geoff J. Shannon	412
11.4.7	Hybrid Welding – Geoff J. Shannon	413
11.4.8	Weld Testing – Geoff J. Shannon	413
11.4.9	Plastic Welding – Geoff J. Shannon	413
11.4.10	Material Welding Summary – Geoff J. Shannon	414
11.4.11	Laser-Welded Tailored Blanks – Dave F. Farson	414
11.4.12	Automotive Applications – Andreas Gebhardt	417
11.5	Comparison of Laser Welding to Other Welding Technologies	418
11.5.1	Alternate Welding Technologies – Geoff J. Shannon	418
11.5.2	Key Aspects of Comparison – Geoff J. Shannon	421
11.5.3	Laser Welding Comparisons – Dan Gnanamuthu	423
11.5.4	Comparison of Welding Technology Results – David Havrilla	423
